THE BENCHMARK IN BRICKS

A BRAND OF

BRICKWORKS

Product – Bowral 76 | Bowral Blue
Architect – Arkhaus Studio | Photography – Alexander Mayes

A Reputation for Excellence

Our tradition, experience and reliability has made Bowral Bricks the first choice for architects, builders, developers and home buyers. Our continued commitment to quality ensures Bowral Bricks will remain the benchmark for excellence for many years to come.

Bowral Bricks

Bowral dry pressed bricks are the premium product for your building project. Proven in tough Australian conditions for more than a century, dry pressed bricks are renowned for their long lasting quality.

Bowral dry pressed bricks and pavers are made to last using time-honoured techniques and modern technology. Choose the Bowral Bricks range for their unsurpassed quality that only one of Australia's most experienced brick makers can offer.

Unique colours for authentic appeal

Earthy terracotta tones. Creamy browns and beiges. Subtle golden shades. With such an extensive colour range available, Bowral Bricks are guaranteed to add a beautiful finish to your building project.

The unique colour variations in each delivery of Bowral Bricks also ensures the authentic appeal that comes only with traditional manufacturing techniques.

A Superior Building Product

Tradition of timeless quality

Bowral dry pressed bricks have been delivering timeless style and quality throughout the years, first producing this ever-popular range in the early 1900's. Many decades later, Bowral Bricks continues to manufacture dry pressed bricks using traditional craftsmanship techniques in Bowral, New South Wales.

The premium building product

Bowral Bricks selects the finest quality clays and shales to create a clay mix, which is compacted into individual moulds at high pressure to produce solid and dimensionally accurate dry pressed bricks.

The nature of manufacturing provides them with extremely low moisture expansion, therefore offering a very stable building material. Modern technology helps meet nation-wide demand for dry pressed bricks designed for today's residential and commercial building applications. Bowral Bricks are individually moulded, providing a point of difference from contemporary, high volume brick production.

Shapes to suit your building needs

Bowral Bricks are available in a range of special shapes, allowing limitless design possibilities, allowing you to add individuality to both the interior and exterior of your development. Endless design patterns and custom colours make Bowral dry pressed shapes the perfect solution to versatile building design.

Build on our award winning reputation for excellence

Our continued commitment to quality ensures Bowral Bricks will remain the benchmark for excellence for many years to come.

Winning prestigious international and local architecture awards, emphasises the high standard and quality that is the core soul of the Bowral brand.

100 Years of Style Guaranteed

Many of the most beautiful buildings and streetscapes are built with brick. With their inherent and unmatched beauty, its no wonder bricks are consistently the number one choice of material in Australia.

- 1. Low maintenance**
No need to paint or perform other treatments to maintain their aesthetics and durability. They are strong, reliable and relatively maintenance free.
- 2. Energy efficient**
Combined with intelligent passive building design elements, clay bricks can help moderate building temperatures and reduce energy consumption.
- 3. Affordable**
Cost effective building product materials that increase the value of your investment or project from day one, for generations to come.
- 4. Strength and safety**
Clay products are stronger than concrete and other light weight materials and also provide a safer and more secure home from the outside environment.
- 5. Naturally sustainable**
Clay is a natural resource which has been used for centuries because it retains its colour forever as well as its durability. Architects, engineers and specifiers continue to appreciate the advantages of using clay products.
- 6. Peace of mind guaranteed**
Bowral Bricks are backed by an exclusive Brickworks 100 year warranty.

- Bowral Gable

Bowral Highlands

Made in NSW

Using clay sourced from the Southern Highlands of New South Wales, these tactile creations are blended by our master brick-makers to spectacular effect. Bowral Highlands offers shades that morph from light to dark, with natural seams of colour within each brick. These expressive veins result in a crafted brick unlike any other; the perfect balance of form, function and enduring class.

Bowral 76

These distinctive dry pressed bricks made in Bowral, New South Wales, since the early 1900's. Bowral Bricks have featured in many of Australia's most admired and awarded architectural designs.

Their sharp edges and inherent character combine with the distinctive Bowral clay colours to create what can only be a Bowral Brick.

Bowral 50

The sleek, low profile Bowral 50 is our response to contemporary design trends and offers another dimension for architects and builders.

The slimline profile of Bowral 50 creates an elongated linear form in contemporary brickwork, appearing to lengthen the wall, adding sophistication and elegance to the design.

Bowral Blends

A contemporary update of a firm favourite. Often used to add design depth to commercial projects due to their colour variations and vibrantly rich tones, Bowral Blends are both a historical reminder of Australian brick making heritage, coupled with forward-thinking sustainability.

Bowral Shapes

Made in NSW

[For more information](#)

For the full array of shapes and measurements available please see our Bowral Special Shapes Brochure.

Bowral Shapes are used in conjunction with standard bricks, adding distinctive architectural features to any project. Unusual and stylish, they evoke memories of an earlier age when the artisan bricklayer was able to use distinctive 'shapes' in their work in buildings that today are considered heritage and of great value.

Mortex

Mortex is a factory manufactured, quality assured premixed M4 rated mortar solution. Its consistency can save labour time, increase efficiency, remove the need for on site blending, and it is compliant with AS3700:2018. Mortex takes the guess work out of mortar blending and reduces the potential for under strength, non compliant mortar use.

Mortar Finishes

There are four common mortar finishes and these various finishes result in different shadow lines on the wall. A raked finish will create a deep shadow in the mortar joint. This brings out the horizontal lines of the brickwork (and the vertical lines to a lesser extent) and it is the most common finish. Ironed and struck joints also create shadow lines, but these are much finer and more subtle. A flush joint doesn't allow shadow lines to form at all, giving the wall a flatter, more unified look. Using a mortar colour to match the brick will take this a step further.

Raked

Ironed

Struck

Flush

Mortar Colours

White mortar is currently the most popular colour. This is made by mixing light coloured cement and white sand and results in a traditional brick and mortar look. Mortar can be coloured by adding powdered or liquid pigments to the mortar as it is being mixed by the bricklayer. It can also be tinted to match the brick colour, giving a very even wall colour. Please confirm with your bricklayer what their mortar colouring offering is before making your final decision.

Slip resistance

The Wet Pendulum Slip Test, outlined in AS 4586, classifies the slip rating of new surface materials that are prone to water exposure. The material is tested using a Pendulum Friction Tester and scored a British Pendulum Number (BPN). The slip rating is based on a minimum of five (5) tests, in which the average of the last three (3) BPN score is used. This average score is referred to as the Slip Resistance Value (SRV) and is classified from P0 (Least resistant) to P5 (Most resistant). All Bowral pavers have achieved a P5 rating.
