## Bricks and Pavers

# Australia's leading brick manufacturer

## 8 in 10 new homes are built with brick

Known for our ever-dependable products and services, Austral Bricks is backed by an exclusive 100-year warranty, so you can be confident your investment is in safe hands.

Founded in 1908, Austral Bricks have been leading the way in brick manufacturing and design for over 100 years. It is no surprise we have an enduring relationship with our customers, and we are consistently chosen by leading builders, and world-class architects and designers.

Owned and operated in Australia, Austral Bricks manufactures bricks in Australia, for Australians, designed to meet the demands of the harsh Australian climate.

Our presence extends globally, with our bricks being consistently chosen by the world's most inspiring architects and designers to construct iconic architecture everywhere from Hong Kong to Amsterdam. Plus, we have a design studio open on Fifth Avenue, New York.

# Brick is simply beautiful

---

## 100 years of style guaranteed

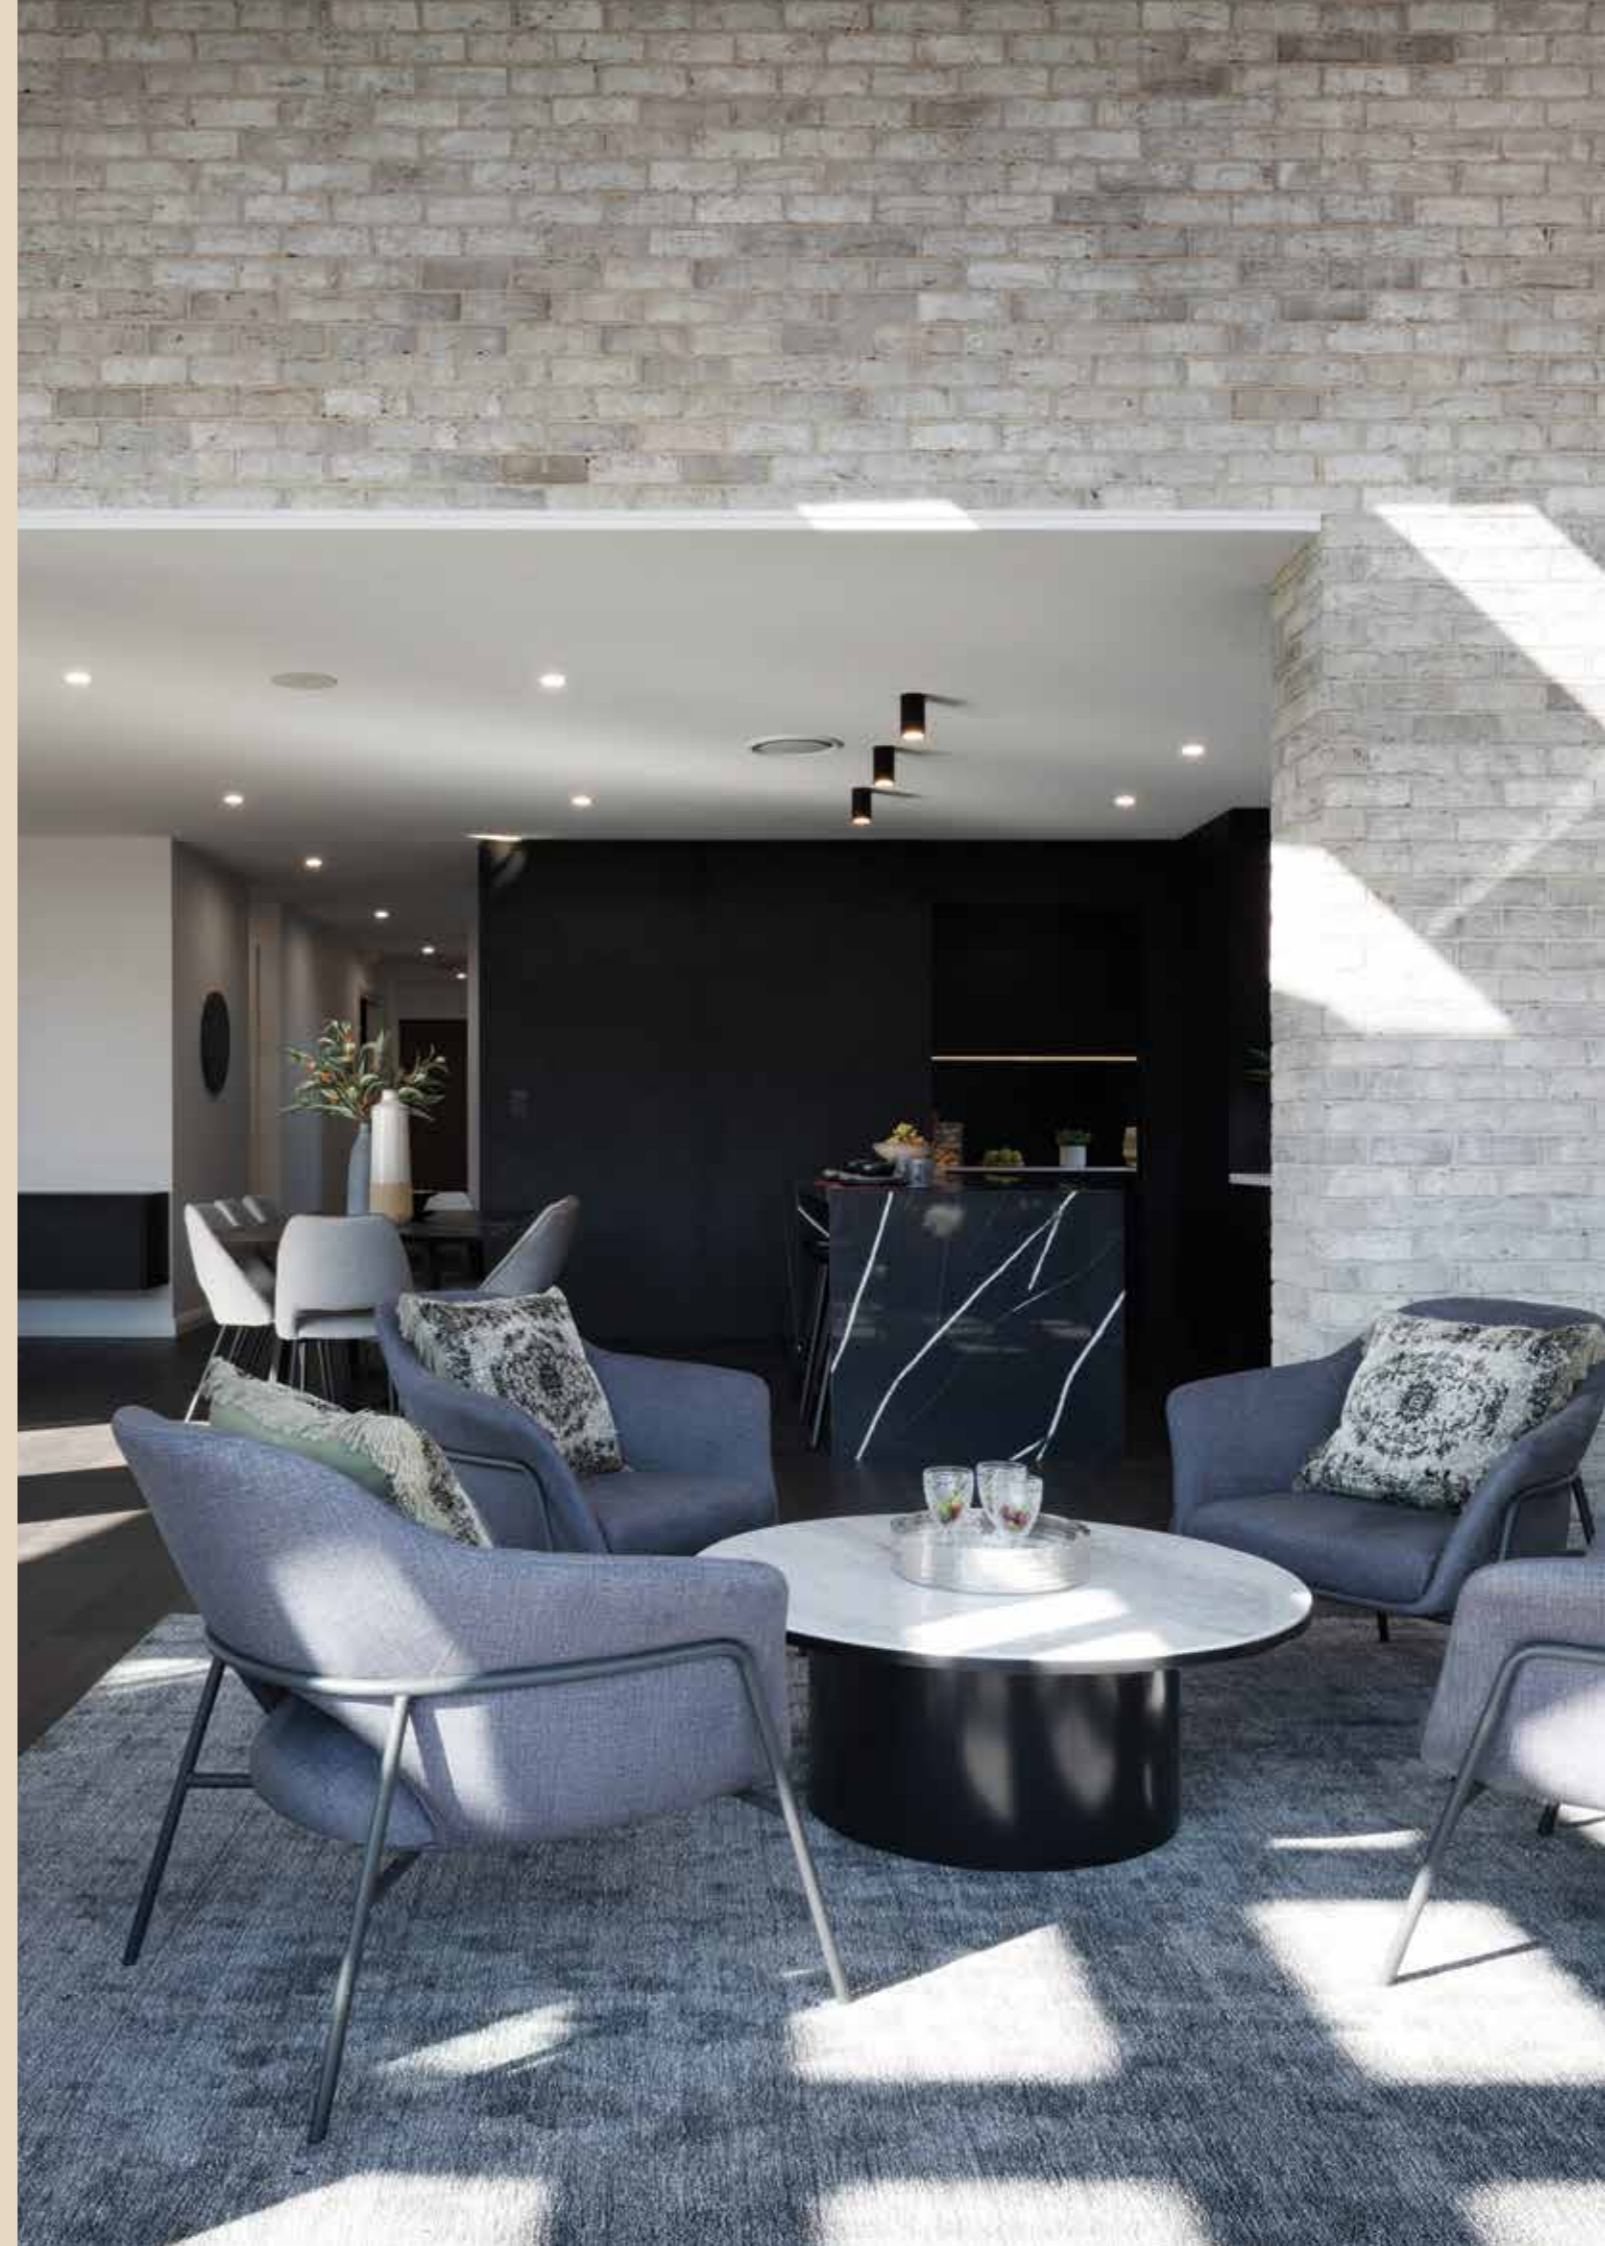

Many of the most beautiful buildings and streetscapes are built with brick. With their inherent and unmatched beauty, it's no wonder bricks are consistently the #1 choice of material in Australia.\*

The world's most inspiring architects and designers consistently choose brick for everything from world class projects to experimental ideas. Brick has been used to construct iconic and magnificent homes and buildings including The Calile Hotel in Brisbane, the Merri Creek Home in Melbourne, and Aesop in Hong Kong.

Plus, the beauty of brick is timeless. Your home says a lot about who you are, so don't settle for short-term fads like lightweight board that are guaranteed to date quickly, look tired as they age and come with a limited product warranty. Bricks have enduring style that, when backed with a 100-year warranty, is guaranteed to look stylish forever.

## Complimentary Services

### The inspiration and expertise you need

With our comprehensive series of colour and style palettes, skillfully curated from the huge range of Brickworks building materials available, you can select a thoughtful and stylish scheme for any house, whether it's cutting edge contemporary or more traditionally influenced.

Our expert design consultants can talk you through colour and style swatches in a friendly one-to-one session, helping you pick a scheme you love for your vision.

**Book your one on one colour appointment**  
Visit. [australbricks.com.au/style-inspiration](http://australbricks.com.au/style-inspiration)

### Seamlessly visualise your dream home

Using Artificial Intelligence and digital technology, you're now able to experience colours, forms and profiles with our online colour visualisation tool. iVisualise helps make selection seamless and simple – whether you're looking for a more traditional product, or something more contemporary.

Our new and upgraded iVisualise tool will guide you on designing for your dream home. It's all at the touch of a button.

**Use our online colour visualisation tool**

# Bricks are designed to last

**Versatility in design, durability that lasts a lifetime and the highest thermal comfort, with almost no maintenance. Clay bricks and pavers from Austral Bricks tick all the boxes for homes and projects with value and sustainability in mind.**

## Affordable Value

Brick is the only material that will continue to make you money now, and in the future. Your building material is the most important decision you will make when building your new home, so you want to be confident you are making the right choice.

From the minute you choose to build your home with brick, your decision will start paying dividends. In fact, building with brick will increase the value of your home by 10% which could be up to \$130,000\*. Ask yourself, what is a 10% increase in the value of your home worth to you?

Whether you are building an investment property, your first home, or your forever home, don't you want to build with the material that is going to provide the biggest return on your investment?

## Low Maintenance

Bricks require zero maintenance, meaning you have one less thing to worry about. Bricks don't fade, rot, rust or decay, meaning they remain completely weatherproof, durable and attractive forever without you having to lift a finger.

Independent research conducted by the Queensland Department of Housing has shown that building with brick can save you thousands of dollars in reduced maintenance bills, making them a one-off investment that will immediately start giving you back time and money.

Your time is precious, don't waste it on lightweight materials that require consistent attention and maintenance to retain their aesthetics and durability. If you build with lightweight materials, prepare for high lifecycle costs that will require you to spend time and money on:

- Painting and repainting,
- Coating,
- Rendering,
- Varnishing,
- Sealing,
- Repair and replacement.

So, whether this is an investment property, your first home, or your forever home, ask yourself, do you have time and money to spend on maintenance?

## Strength and Safety

Unlike other materials, bricks are fireproof – when you build with brick, you are protecting your investment and your loved ones.

A lot of time, effort and money goes into building your dream home, so you wouldn't risk losing it by building with lightweight materials that are not resistant to fire. Bricks are fireproof, which means they are not flammable, not combustible and do not burn.

The risk of bushfires are increasing, and Australians are all too familiar with the devastation they can cause. Brick is the only material to satisfy the requirements of The Australian Standard AS 3959–2018 Construction of Buildings in Bushfire Prone Areas, giving you the confidence that your home is safe and durable for your family.

## Energy Efficient

A home built with brick helps you do your bit for a more sustainable planet, while reducing your bills by up to 40% – win-win!

The importance of building a sustainable home for the future is only growing. Eight years of independent research conducted by The University of Newcastle has proven that when it comes to energy efficiency, brick performs the best and lightweight materials perform the worst. In fact, brick will save you up to \$500 every year that would otherwise be spent on energy bills and maintenance if you built with lighter weight materials\*. Over 10 years, that's a saving of \$5,000 with no effort from you.

## Naturally Sustainable

If you want a sustainable home – bricks are the only choice.

Building a sustainable home has never been more important. There are 3 ways that building with brick will make your home more sustainable both now, and into the future:

1. Reduced household emissions – building with brick helps you use less energy, which means you can save you up to 2 tonnes of carbon pollution every year!\*
2. Can be reused or recycled – Unlike other building materials, bricks recycle well. Reusing building materials saves about 95% of the energy used to manufacture them, which would otherwise be wasted.
3. Carbon neutral - Austral Bricks are the first in Australia to have certified carbon neutral bricks, as certified against the Australian Government's National Carbon Offset Standard. That means we have significantly reduced our carbon footprint and offset the remaining emissions.

# New Arrivals

– Thin Brick

1

## Thin Brick

Because Thin Brick is genuine brick only thinner, it gives you more flexibility to add style and authenticity to any part of your house, reducing the cost and time that it would take for standard brick applications. From striking splashbacks to inviting outdoor entertaining areas, there's no limit to Thin Brick's range of applications inside or outside your home.

## Nelissen

Made with an exquisite rustic texture, Nelissen bricks are sculptured pieces in themselves. In fact, due to the irregular folded grooves and exquisite colours, each is a genuinely unique work of craftsmanship. Created using a combination of age-old materials, and ultra-modern kiln techniques, Nelissen's multi-shade faces and rich velvety sand surfaces are the result of years of dedicated research and development.

## Forest

Made from specially sourced clays and colourful oxides, each brick has been carefully designed to exude a grounded realness, but with a contemporary edge. Authentic in their material origins but with five exciting colourways, these gently textured bricks are equally at home in traditional builds and architectural projects. Lush, richly textured and rustic, they are a perfect example of the craft of brickmaking expertise.

# Mortex

Mortex is a factory manufactured, quality assured premixed M4 rated mortar solution. Its consistency can save labour time, increase efficiency, remove the need for on site blending, and it is compliant with AS3700:2018. Mortex takes the guess work out of mortar blending and reduces the potential for under strength, non compliant mortar use.

## Mortar Finishes

There are four common mortar finishes and these various finishes result in different shadow lines on the wall. A raked finish will create a deep shadow in the mortar joint. This brings out the horizontal lines of the brickwork (and the vertical lines to a lesser extent) and it is the most common finish. Ironed and struck joints also create shadow lines, but these are much finer and more subtle. A flush joint doesn't allow shadow lines to form at all, giving the wall a flatter, more unified look. Using a mortar colour to match the brick will take this a step further.

## Mortar Colours

White mortar is currently the most popular colour. This is made by mixing light coloured cement and white sand and results in a traditional brick and mortar look. Mortar can be coloured by adding powdered or liquid pigments to the mortar as it is being mixed by the bricklayer. It can also be tinted to match the brick colour, giving a very even wall colour. Please confirm with your bricklayer what their mortar colouring offering is before making your final decision.

## EXP = Exposure grade

Suitable for use in external walls exposed to aggressive environments, such as; areas subjected to salts in the soil, adjacent material or ground water, in coastal areas exposed to attack from windborne salt spray, or retaining walls subjected to fertilisers and ground salts.

## GP = General purpose

Suitable for internal and external walls only when above a sheet or membrane damp-proof course and protected by an adequate coping, eaves, roof or similar top covering. These units should not be directly exposed to saline environments.

## Solar absorptance rating

In the design of energy efficient buildings, architects and consulting engineers need to be able to calculate the heat loss or gain of materials used to construct these buildings.

For this reason, our product range has been categorised into the below three colour groups:

**Light (L)** < 0.475

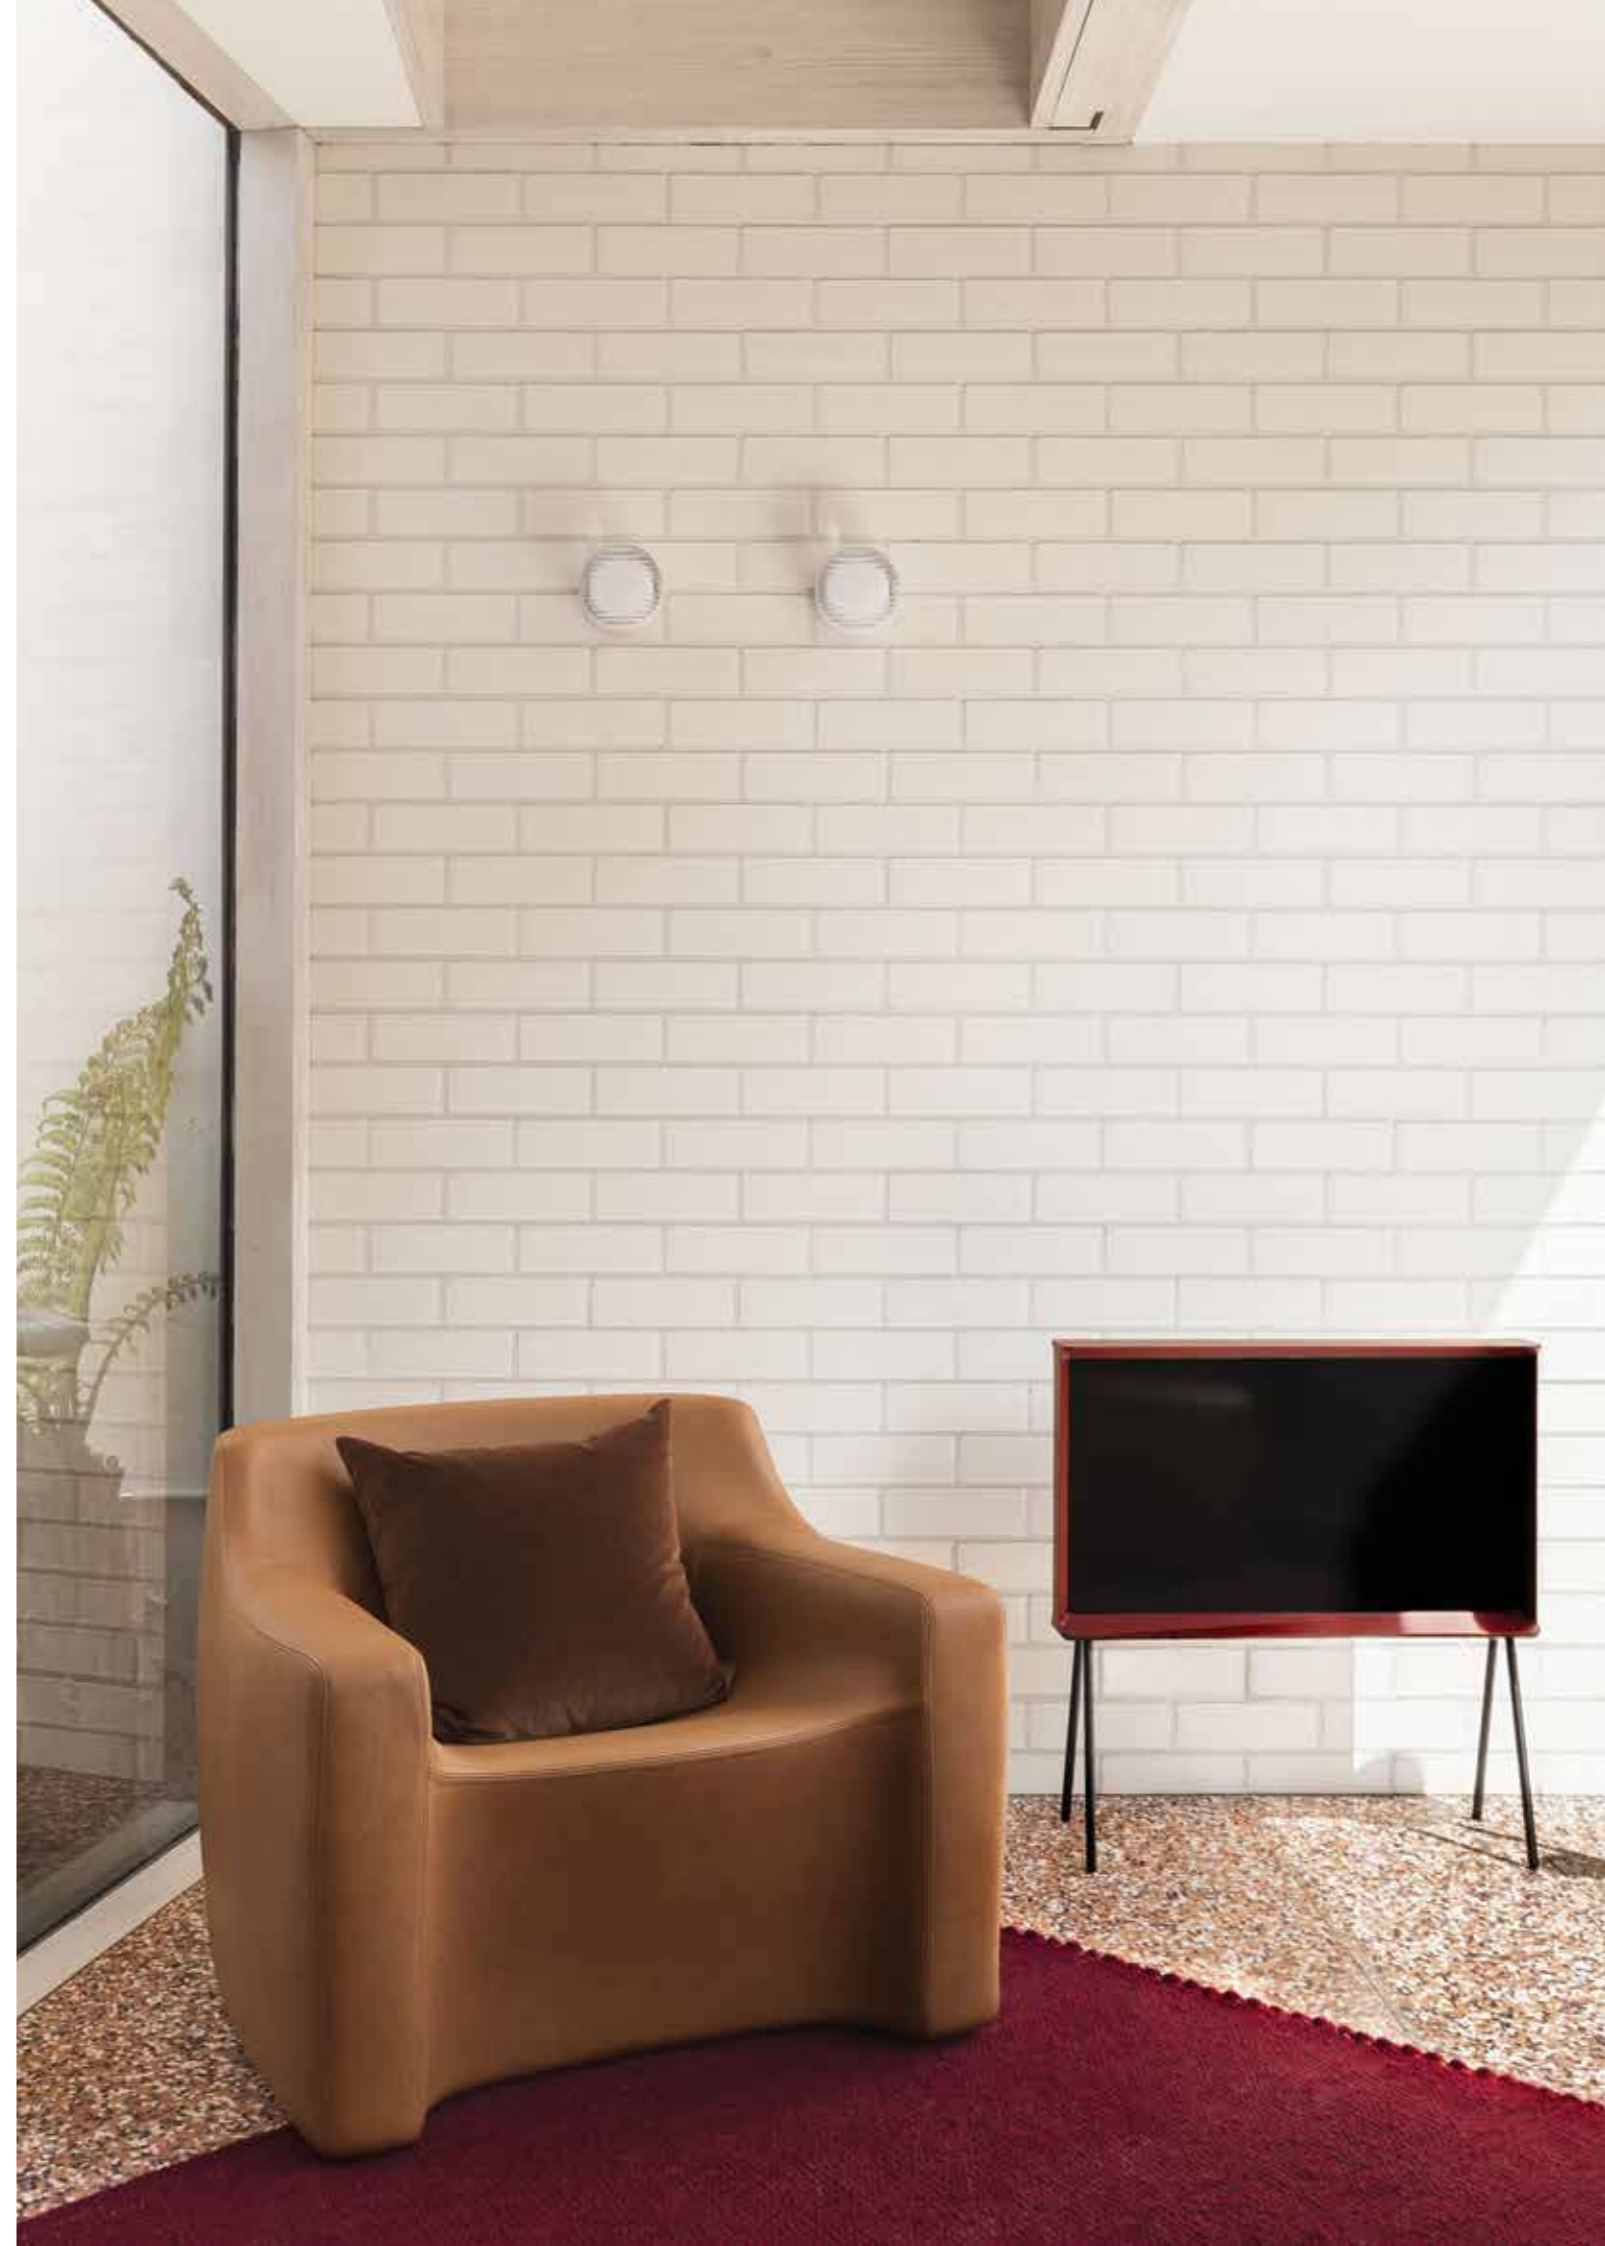

**Medium (M)** 0.475 - 0.70

**Dark (D)** > 0.70
