^ Lava Stone Slim Line

Using the finest quality real stone, precision cut and beautifully finished, Designa Basalt is the ideal feature for both internal and external use.

The Designa Basalt range is a collection of natural stone bricks. These bricks are cut from Basalt and finished in 3 different surfaces and 2 sizes.

Like all bricks, they can be easily laid by traditional bricklayers using a conventional mortar bed.

To protect the face, each brick in the Lava Stone and Shadow Stone ranges are coated with a thin plastic film.

Designa Basalt will complement any home as a feature panel for both interior and exterior walls.

Being a natural stone product, it is recommended that once laid, the bricks be sealed. Austral Bricks can assist with cleaning and sealing recommendations.

Like all Austral Bricks products, Designa Basalt stone bricks are virtually maintenance free, totally weather resistant, long lasting, have high thermal mass for better energy efficiency and add a distinct premium feel to any home or project.
