

Jarrah Hardwood Joinery and Furniture Timbers

Jarrah is an extremely durable hardwood, renowned for its strength and beauty. With colours ranging from light pinks to deep reddish browns, it is one of Australia's most unique hardwoods.

Auswest Jarrah is expertly kiln dried and reconditioned to meet specific market requirements throughout the world and comes in a range of sizes to suit any application. From decorative applications, to flooring and decking, stair treads, door and window frames and furniture pieces, Jarrah hardwood is extremely versatile and its beauty will last a lifetime.

Technical Information

Species	E.marginata
Common Name	Jarrah
Origin	Found only on lateritic soils in the southwest of Western Australia
Colour	Light Pink to reddish brown
Workability	Relatively easy to work with common woodworking tools
Durability class	Class 2 Jarrah is a highly durable hardwood with natural flame – resistant properties . When used in exterior applications it exhibits excellent termite and rot resistance.
Hardness	8.5kN
Kiln Dried Density	About 820kg/m ³
Strength Group	54
Modulus of Rupture	112MPa
Modulus of Elasticity	13,000MPa
Maximum Crushing Strength	61MPa
Grades	Prime and Standard
Sizes	75/100/150/200/250/300x25 75/100/150/200/250/300x38 75/100/150/200/250/300x50

The Sustainable Resource

Auswest Timbers is supplied with logs harvested and sourced from sustainably managed forests by the Western Australian Government's agency, the Forest Products Commission.

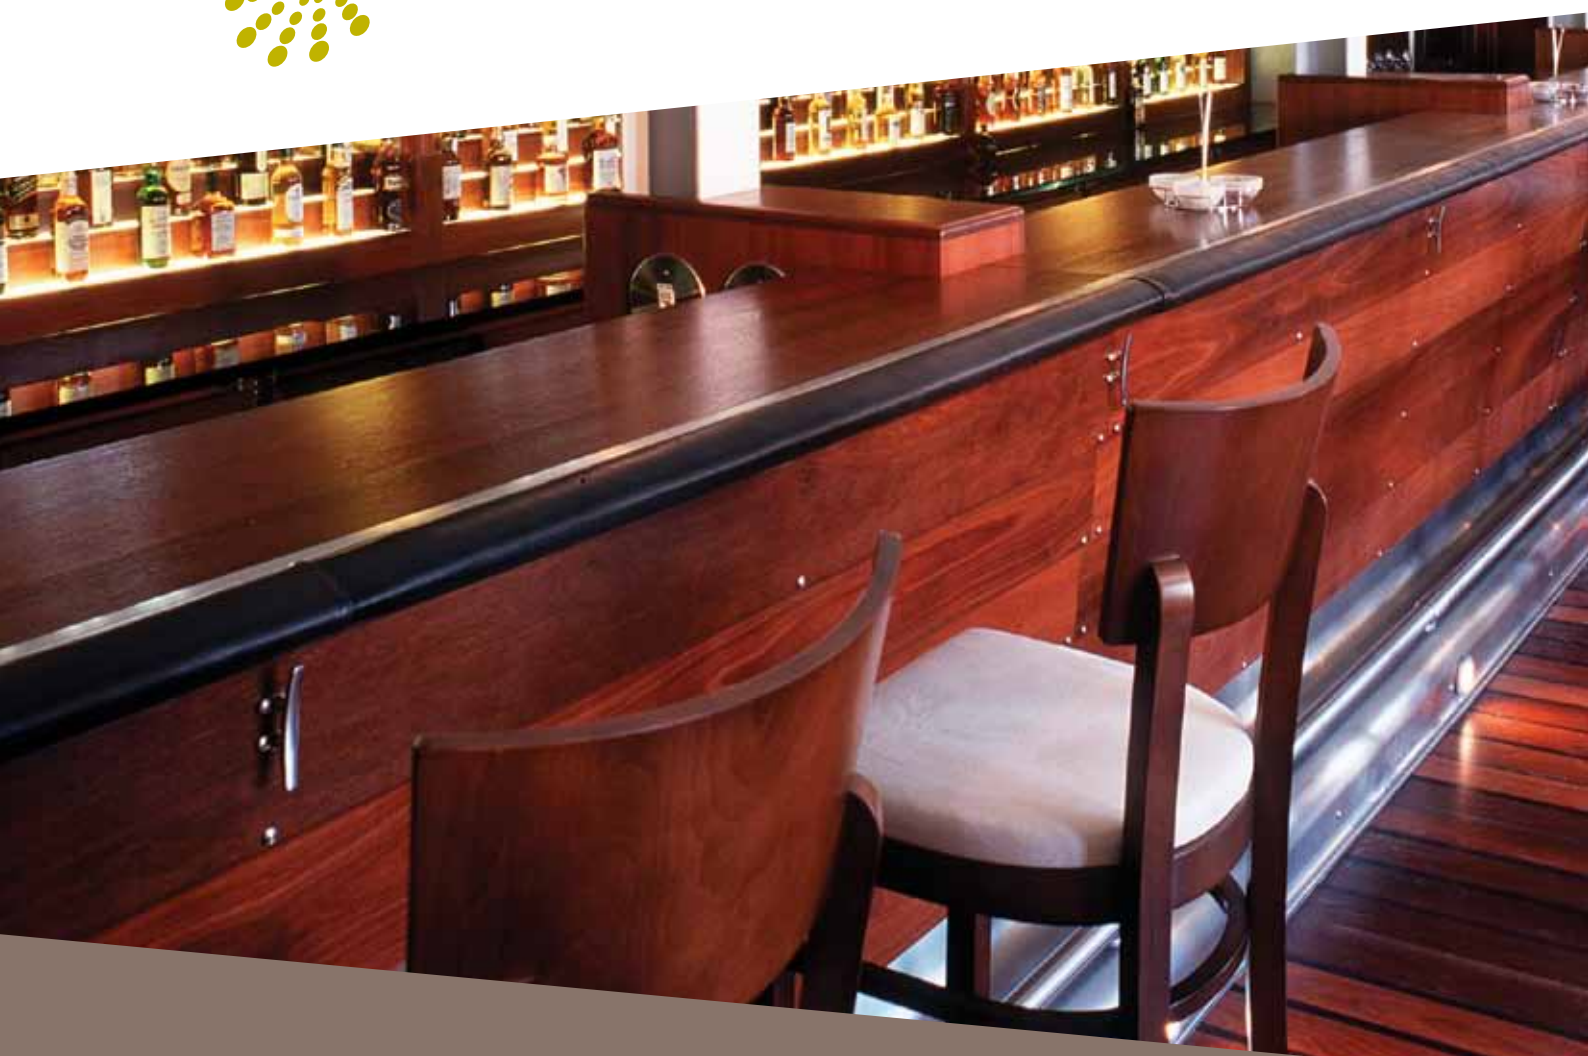

The Forest Products Commission has implemented an environmental management system that has been certified as complying with the requirements of the international standard AS/NZS ISO 14001 and in January 2009 achieved certification to the Australian Forestry Standard (AFS).

For more information about the AFS, please visit www.forestrystandard.org.au.

To further assure our customers that all timber supplied from grower to manufacturer is sustainably managed, Auswest Timbers achieved Chain of Custody certification in April 2012.
