

# Coastal

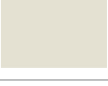

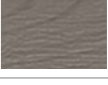

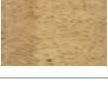

The Coastal look is inspired by the vast Australian coastline. The style is less pristine than the Hamptons, with a more 'lived-in' feel and more trinkets in the decor, and features more blues, and natural raw materials.

Architect Alex Popov  
Photography Fiona Sustanto

Creating a welcoming ambiance, the Coastal style is abundant with natural light, and makes the most of open spaces, reminiscent of the expansive shores of Australia's lush coast. With unique decor and furniture, this style has a cozy beach-feel and is quintessential to the Australian way of life.

## Coastal Material Palette
