

Industrial

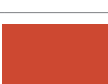

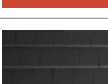

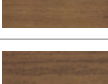

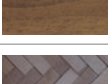

The Industrial style look is ideal for inner-city dwelling. You don't need a big space to execute this theme, and it is ideal for apartment living.

Builder Fowler Homes
Photography Robert Cameriere

The Industrial style is rich in texture, with a moody and dark colour palette. The materiality of the Industrial look is tactile, with a combination palette of metal, wood and brick. Whilst the most-part of the theme is refined in its colour palette, that is not to say that it is dull. With sporadic pops of colour throughout the house, the Industrial look can still be playful and exciting in its style.

Industrial Material Palette
