

# Modern Farmhouse

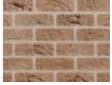

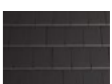

With a focus on earthy materials, reminiscent of those in an original farmhouse, this style is composed predominantly of textural materials such as brick, timber and steel.

Designer & Builder Dean Bolger from Castle Glenn Homes  
Photography Black Bee Studio

The Modern Farmhouse is perfect for a home-owner wanting to create the style of a rural escape, in their own home. To create a cozy, bucolic style, brick is the perfect option. As a material choice, brick is hard-wearing, and durable, and as an aesthetic choice, it offers a rustic, lived in character.

## Modern Farmhouse Material Palette
