build better.

The PermaTech Finishing Solution

The sky's the limit, from artistic designs, shapes and textures in any colour you can imagine, PermaTech brings your imaginative designs to life.

PermaTint

a colouring solution offering a vast array of long lasting colour options.

PermaForm

allows shapes and textures to be imprinted into the panels surface.

Use the finishes individually for eye catching designs or combine them to create inspiring art in concrete.

Supplied prefinished with no further materials, labour or applications required, PermaTech can eliminate the need for onsite scaffold and trades for post finishing.

More importantly, the finishes achieved are long lasting and designs are created with intricate detail unmatched by many competing alternatives.

These are just some of the benefits of using the innovative PermaTech Finishing Solutions on your next project:

- A truly consistent finish and outstanding attention to detail with unlimited potential for design concepts.
- Colours and finishes used to create panels today can be replicated in the future for building expansion.
- Maintenance is reduced thanks to superior colour and finish longevity and durability.
- The need for scaffolding and labour required to apply finishes on site are removed, offering time and cost savings for the project.
- The required finishes are incorporated into the precast elements rather than applying onsite.

The factory-applied PermaTint Solution is a long-lasting alternative to the on-site painting of precast panels.

PermaTint

Colour options are endless, and finishes, from metallic, translucent, to natural stone can be achieved with ease and in a vast array of choices.

PermaTint is a colouring solution, but not as you know it.

Discover colouring that goes beyond paint and actually binds with the concrete panel to which its applied, creating a long lasting, deep finish which will never peel and is UV, mould, mildew and weather resistant.

From substrate to surface PermaTint embeds itself in the panel for a finish with unmatched longevity, resistant to fading, and cracking.

Austral Precast is so confident in the longevity of the finish we offer an industry leading 25 year colour guarantee.

PermaTint is available in virtually any colour. Below are some of the standard options available:

Opaque

Metallic

Translucent

Stone

PermaTint is available in virtually any colour you can imagine.

Adding depth
to concrete.

PermaForm

Three dimensional designs brought to life. Shapes, artistic designs, and intricate details are formed in concrete, and designed to last a lifetime.

The PermaForm process takes liquid concrete and moulds it into limitless creations with patterns and finishes mimicing anything from timber grain, hewn stone to any number of imaginative designs with unprecedented definition.
