About Panel Bricks

1

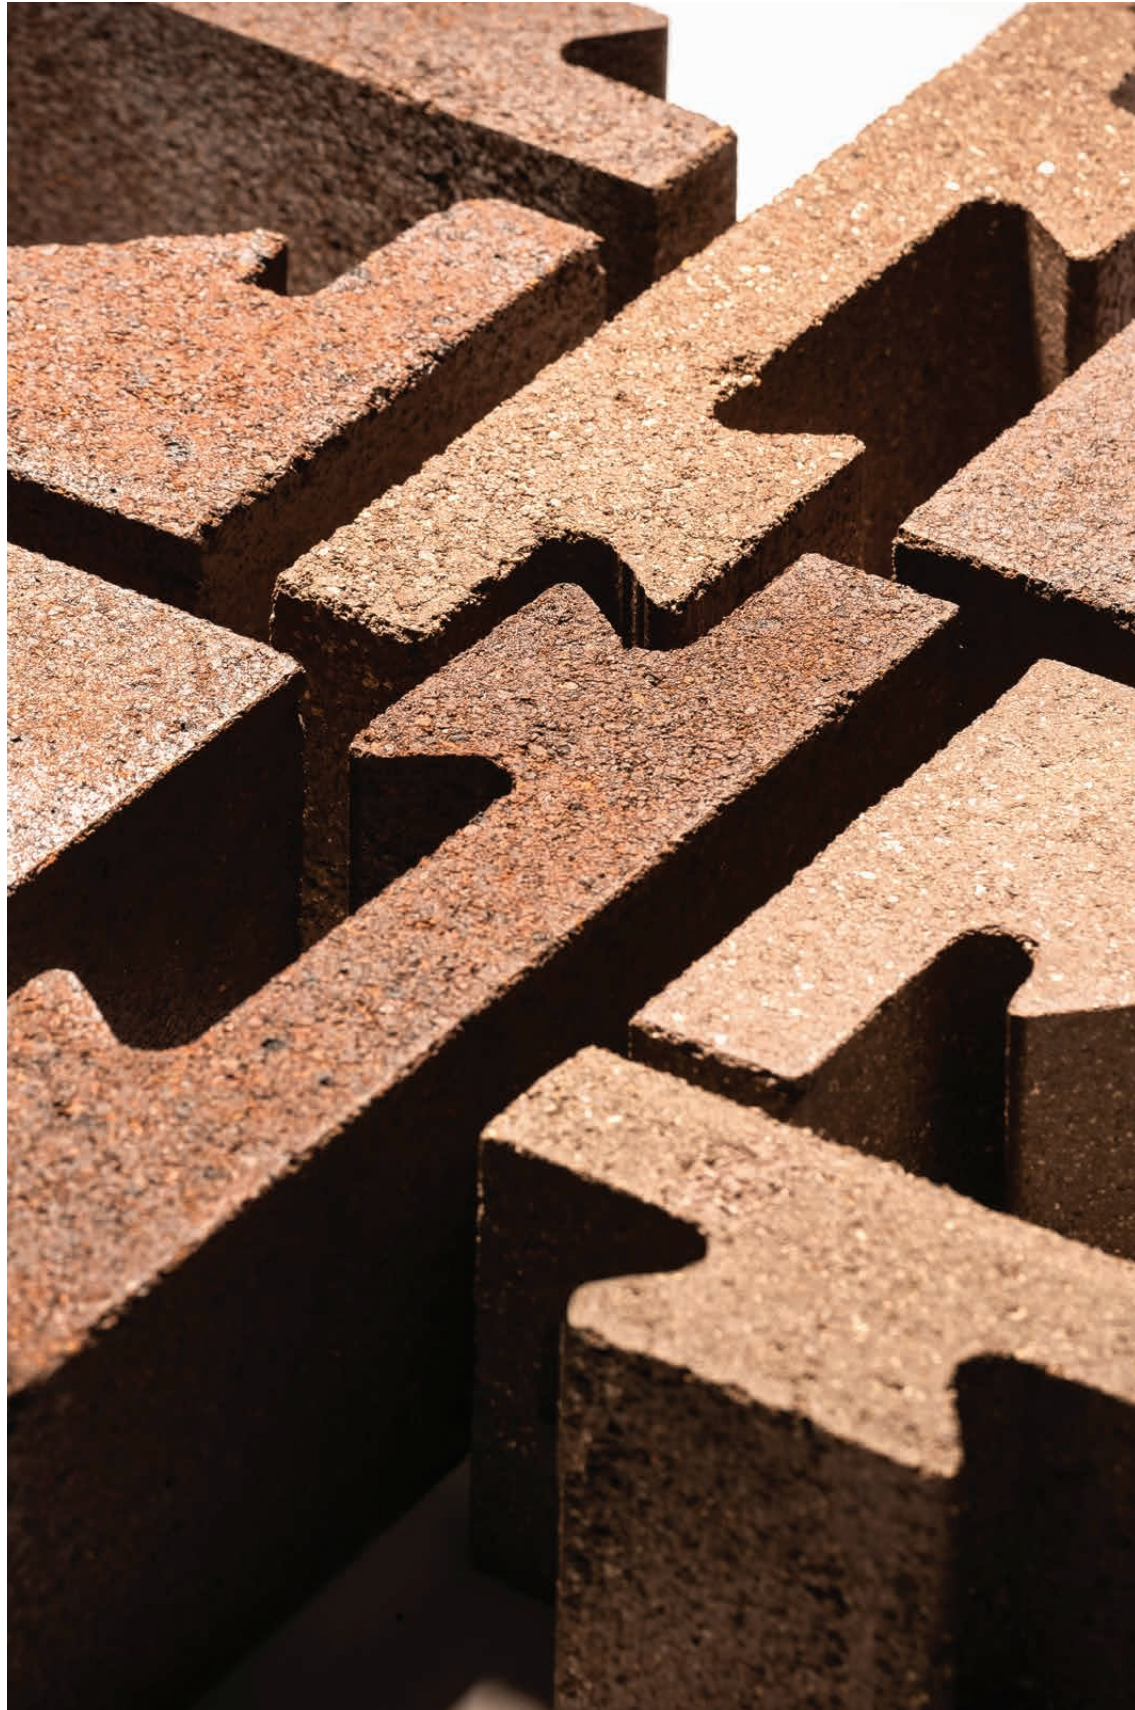

Panel Bricks

The speed of precast panels meet the natural beauty of bricks.

Brickworks manufacture specialised brick facings and brick dovetails for precast companies to embed within their precast concrete panels. This incredible process allows for face brick to be applied to great heights, and afford the project all of the benefits that clay bricks have to offer, such as; long-lasting finishes that are low maintenance, outstanding thermal performance, and a seamless exterior finish from top to bottom.

Panel Brick is the fastest way to build in brick, and alleviates hurdles where laying traditional brickwork is not possible.

Precast manufactures can specify any of the Austral Bricks & Bowral Bricks collection currently offered on the east coast of Australia.
