

CONCRETE ROOF TILES

people look up to Bristle

BEAUTIFUL PRODUCTS

with enduring style

Concrete roof tiles are one of Australia's most popular roofing materials.

Homebuyers appreciate their beauty and durability and the diverse range of colours and profiles. Bristile Roofing uses top quality oxides to ensure long lasting and vibrant colours that will blend beautifully into any setting.

Whether your home is contemporary or traditional (or somewhere in between) there is sure to be a Bristile Roofing concrete tile colour and profile to suit.

Bristile Roofing is part of the Brickworks Building Products Group, one of Australia's largest building products companies, with a stable of leading brands dedicated to manufacturing innovative products for Australians and the world for over 100 years.

As part of this group, our current products include concrete and clay roof tiles, masonry blocks, retaining wall blocks, bricks, pavers, precast concrete panels, timber products, terracotta façade systems and specialised building systems.

BENEFITS

of concrete roof tiles

Research conducted by universities and independent institutions, confirms that a roof constructed from clay or concrete roof tiles offers many benefits. The research shows that roof tiles can reduce energy consumption, do not rust or corrode and offer the added benefits of fire resistance and sound insulation.

Extensive testing and research has been conducted and the results show that roof tiles offer the following benefits:

Affordable

Concrete roof tiles are one of the most affordable roofing products on the Australian market.

Will not rust or corrode

Concrete roof tiles are ideal for use in coastal areas as they are impervious to rust and corrosion.

Strong and durable

Concrete roof tiles must comply with strict standards in strength and concrete roof tiles actually increase in strength as they age.

Bushfire safe

Concrete roof tiles are ideal for bushfire prone areas as they are non combustible.

Ideal for collection of water run off

Water run off from tiled roofs is as safe to use as that from any other roofing material.

Comprehensive Warranties

When it comes to longevity, concrete and clay roof tiles both outperform the leading competing alternative. Concrete roof tiles offer a 50 year product warranty and a 10 year Total Roof Warranty.

Extensive colour and profile range

Roof tiles are available in more colour and profile combinations than any other commonly used roofing product in Australia.

Sound Insulation

Concrete roof tiles can reduce noise by 30 decibels which is more than twice the noise reduction achieved by other commonly used roofing materials.

Reduce cooling requirments

Testing of similarly coloured roofing products shows roof tiles have a lower cooling requirement than other commonly used roofing materials.

Low in embodied energy

Testing shows that concrete roof tiles are the lowest embodied energy product of the three most commonly used roofing materials.

Offer excellent solar reflectivity

Testing shows that roof tiles will reflect more heat away from the home than other commonly used roofing materials.

ROOF TILE

Information

Bristle Roofing concrete roof tiles have developed a reputation for achieving the highest quality colours and finishes of any concrete tile in the Australian market.

Available in a variety of profiles and collection of colours, concrete roof tiles offers a range of options designed to suit your style.

Extensive Colour Range

A vast range of modern colours that will suit all tastes.

50 Year Product Warranty

Our quality concrete roof tiles offer strength and durability to ensure they will stand the test of time.

Profile Choice

Classic (low profile), Designer (shaped) and Prestige (flat) distinctive styles to complement any project.

Quality Oxides

We use only the best quality oxides for deep, long lasting colours that will stand the test of time.
