*beautiful products with enduring style*

# BEAUTIFUL PRODUCTS

*with enduring style*

Concrete roof tiles are one of Australia's most popular roofing materials.

Homebuyers appreciate their beauty and durability and the diverse range of colours and profiles. Bristile Roofing uses top quality oxides to ensure long lasting and vibrant colours that will blend beautifully into any setting.

Whether your home is contemporary or traditional (or somewhere in between) there is sure to be a Bristile Roofing concrete tile colour and profile to suit.

Bristile Roofing is part of the Brickworks Building Products Group, one of Australia's largest building products companies, with a stable of leading brands dedicated to manufacturing innovative products for Australians and the world for over 100 years.

As part of this group, our current products include concrete and ceramic roof tiles, masonry blocks, retaining wall blocks, bricks, pavers, precast concrete panels, timber products, terracotta façade systems and specialised building systems.

# BENEFITS

## *of concrete roof tiles*

Concrete roof tiles are one of Australia's most popular roofing materials. Homebuyers appreciate their beauty and durability and the diverse range of colours and profiles. Bristle Roofing uses top quality oxides to ensure long lasting and vibrant colours that will blend beautifully into any setting.

Research conducted by universities and independent institutions, confirms that a roof constructed from ceramic or concrete roof tiles offers many benefits. The research shows that roof tiles can reduce energy consumption, do not rust or corrode and offer the added benefits of fire resistance and sound insulation.

Extensive testing and research has been conducted and the results show that roof tiles offer the following benefits:

### *Affordable*

Concrete roof tiles are one of the most affordable roofing products on the Australian market.

### *Will not rust or corrode*

Concrete roof tiles are ideal for use in coastal areas as they are impervious to rust and corrosion.

### *Strong and durable*

Concrete roof tiles must comply with strict standards in strength and concrete roof tiles actually increase in strength as they age.

### *Bushfire safe*

Concrete roof tiles are ideal for bushfire prone areas as they are non combustible.

### *Ideal for collection of water run off*

Water run off from tiled roofs is as safe to use as that from any other roofing material.

### *Comprehensive Warranties*

When it comes to longevity, concrete and ceramic roof tiles both outperform the leading competing alternative. Concrete roof tiles offer a 50 year product warranty and a 10 year Total Roof Warranty.

*Extensive colour and profile range*

Roof tiles are available in more colour and profile combinations than any other commonly used roofing product in Australia.

*Sound Insulation*

Concrete roof tiles can reduce noise by 30 decibels which is more than twice the noise reduction achieved by other commonly used roofing materials.

*Reduce cooling requirements*

Testing of similarly coloured roofing products shows roof tiles have a lower cooling requirement than other commonly used roofing materials.

*Low in embodied energy*

Testing shows that concrete roof tiles are the lowest embodied energy product of the three most commonly used roofing materials.

*Offer excellent solar reflectivity*

Testing shows that roof tiles will reflect more heat away from the home than other commonly used roofing materials.

# ROOF TILE

## *Information*

Bristle Roofing concrete roof tiles have developed a reputation for achieving the highest quality colours and finishes of any concrete tile in the Australian market.

Available in a variety of profiles and collection of colours, concrete roof tiles offers a range of options designed to suit your style.

### *Extensive Colour Range*

A vast range of modern colours that will suit all tastes.

### *50 Year Product Warranty*

Our quality concrete roof tiles offer strength and durability to ensure they will stand the test of time.

### *Profile Choice*

Classic (low profile), Designer (shaped), Premiere (shingle), Heritage (federation) and Prestige (flat) distinctive styles to complement any project.

### *Quality Oxides*

We use only the best quality oxides for deep, long lasting colours that will stand the test of time.

# RIDGE OPTIONS

## *Concrete roof tiles*

Bristile Roofing offer two standard ridge systems with concrete roof tiles:

Standard Ridge and Smoothline Ridge.

**Standard Ridge:** The Standard Ridge system creates a stepped finish, with the nose of each ridge sitting on top of the one below it.

**Smoothline Ridge:** The Smoothline Ridge system from Bristile Roofing creates a clean, contemporary finish with each ridge laid in line with the ridge above and below to create one straight ridge line.

*Standard Ridge*

*Smoothline Ridge* – (Please note: extra charges may apply for smoothline ridge).

### *Visum3*

#### **Visum3 Profile**

Creating the aesthetic of three slate tiles, the Visum3 is ideal for traditional country estate style projects and restoration of heritage buildings.

# creating a ROOFING SYSTEM

Insulation | Ventilation | Sarking

## What's right for your home?

The best combination of insulation, sarking and ventilation for your home is dependent on a number of factors including location, aspect, windows and much more. A Building Designer or Architect will be able to assess your particular situation and advise what's best for you.

### Insulation

- Significantly reduces heat transfer through the ceiling.
- Keeps your home cooler in summer and warmer in winter.
- Saves on heating and cooling energy costs.
- A cost effective way to improve your home's comfort.

### Ventilation

- Eliminates the hot air from the roof space in summer to help your insulation work far more effectively.
- Expels damp air in winter which can affect building structures and the effectiveness of insulation.
- Decreases the heat load on ceiling ducted air conditioning.
- Reduced energy costs.
- An inexpensive way to further improve your home's comfort.

### Sarking

- Reflects as much as 95% of heat away from the home.
- Acts as a barrier to dust.
- Provides bush fire protection.
- Is a secondary barrier to water run off.
- Reduces the need for heating and cooling devices.
- Provides additional storm protection.
