2. Limited Peak Power Warranty – Limited Remedy

Warranted percentages of nominal power output:

- 95% in the first five year, thereafter, 90% in the second five years after and 80% after 25 years.

THE COMPANY warrants each Module against defects in materials and workmanship, as per the Mechanical and Electrical Characteristics of the product's Datasheet, that result in the failure of the MODULES to produce the warranted percentage specified above of the nominal power output for the Module set forth in THE COMPANY's product datasheet. If THE COMPANY determines in its discretion that any Module is not providing the warranted percentage of the nominal power output because of defects in materials and workmanship, THE COMPANY will at its option either

(1) replace such loss in power by either, (a) providing additional MODULES to the CONSUMER to make up for such loss in power or (b) replacing the defective Module(s) or part by a functional equivalent or (2) refund the percentage of the Module(s) price, representing the percentage of the power that is less than the warranted percentage of the nominal power according to the current list price of comparable THE COMPANY MODULES.

The remedies set forth in this clause 2 shall be the sole and exclusive remedies provided under the "Limited Peak Power Warranty".

Nominal Power Output in product datasheet is the power in Watts peak that a Photovoltaic Solar Module generates at its Maximum Power Point under Standard Testing Conditions (STC). STC are as follows:

(a) light spectrum of AM 1.5, (b) an irradiation of 1000 per m² and (c) a cell temperature of 25 degrees centigrade at right angle irradiation. The measurements are carried out in accordance with IEC 61215 as tested at the connectors or junction box terminals – as applicable – per calibration and testing standards of THE COMPANY valid at the date of manufacture of the PV-modules.
