AUTHENTIC DESIGN

Product – Traditional | Chapel Red
Architect – Jackson Clements Burrows | Photography – John Gollings

Iconically Australian

—
Born in Melbourne, with its subtly-textured faces and crisply-defined edges, Nubrik encapsulates the colours, qualities and lifestyle that Australians have come to admire. This carefully selected, premium collection of pressed bricks are used in prestigious homes and buildings throughout the country, and will instantly create a look and feel that will never grow old.

Authentic Design

—
Originality is an essential quality of style. Nubrik has remained true to its core principles for close to a century, and produces rich colour blends, found only in genuine pressed bricks. This gives Nubrik an air of glamour and sophistication, making it a versatile architectural choice, able to fit looks both classic and contemporary.

Evolution of Shape and Colour

—
Acknowledged by generations of discerning architects, builders and home-owners, Nubrik's timeless appeal has allowed it to remain desirable no matter what is currently in vogue. With colours and shapes to entice individuality and personality, this premium range's traditional yet cutting edge character, make it ready to take on the next 100 years.

Designed to Last

Natural and authentic design that is strong and reliable.

1.

Low maintenance

No need to paint or use and apply other treatments to maintain their aesthetics and durability. They are strong, reliable and relatively maintenance free.

2.

Expansive range

Brick's natural colours and textures enable you to create both striking façade contrasts and more traditional neutral colour schemes.

3.

Superior strength

Clay products are stronger than other light weight materials and also provide a safer and more secure home from the outside environment.

4.

Affordable

Bricks are a cost effective solution to increase the value of your investment or project from day one.

5.

Energy efficient

Combined with intelligent passive building design, clay bricks can help moderate building temperatures and reduce energy consumption.

6.

Sustainable

Clay is a natural resource which has been used for centuries because it retains its colour forever as well as its durability. Architects, engineers and specifiers continue to appreciate the advantages of using clay products.

7.

Peace of mind guaranteed

Nubrik bricks are backed by an exclusive Brickworks 100 year product warranty.

PRODUCT WARRANTY

New Arrivals

- Nubrik Australis p¹⁶
- Nubrik 290 p¹⁸

1

Nubrik Australis

Developed over months of trials in our Wollert plant, our research and development team has achieved something genuinely special – a pressed brick with timelessly beautiful subtle marbling. It allows the clay to mimic natural rock, creating distinctive and appealing naturally multicoloured tones.

Colours

Wave Rock

Murray Sunset

Coorong

Nubrik 290

Sleek and refined, our Nubrik pressed bricks now come in a new linear format of 290 × 110 × 50mm. Available in any of the Nubrik Australis, Artisan and Traditional colourways, this new format brings a refined contemporary edge to the Nubrik portfolio.

The full Nubrik collection is now also available, made to order in 230 × 110 × 50mm.

Traditional

100 years is enough time to establish a tradition, and time enough to prove a point. For a century or more Nubrik’s brick presses have been moulding solid, authentic pressed bricks in this premium selection. With their crisp, sharp edges Nubrik Traditional bricks exude quality and will endure for generations to come. Their elegance and honesty, rich colour blends and pressed face textures make them extremely popular with the discerning architect, builder and homeowner.

* Made to order, please allow 12 weeks lead time.

Artisan

Nubrik Artisan draws inspiration from Victoria’s frosty alpine environments with their palette of cool grey contemporary winter hues. This range combines a modern grey colour palette with the traditional quality and cachet found in genuine pressed brick. Suitable for both external facades that make a bold statement or as moody internal features, the Nubrik Artisan range perfectly complements modern living, style and design.

Mortex

Mortex is a factory manufactured, quality assured premixed M4 rated mortar solution. Its consistency can save labour time, increase efficiency, remove the need for on site blending, and it is compliant with AS3700:2018. Mortex takes the guess work out of mortar blending and reduces the potential for under strength, non compliant mortar use.

Recommended Mortar Finishes

There are four common mortar finishes and these various finishes result in different shadow lines on the wall. A raked finish will create a deep shadow in the mortar joint. This brings out the horizontal lines of the brickwork (and the vertical lines to a lesser extent) and it is the most common finish. Ironed and struck joints also create shadow lines, but these are much finer and more subtle. A flush joint doesn't allow shadow lines to form at all, giving the wall a flatter, more unified look. Using a mortar colour to match the brick will take this a step further.

Ironed

Struck

Flush

Mortar Colours

White mortar is currently the most popular colour. This is made by mixing light coloured cement and white sand and results in a traditional brick and mortar look. Mortar can be coloured by adding powdered or liquid pigments to the mortar as it is being mixed by the bricklayer. It can also be tinted to match the brick colour, giving a very even wall colour. Please confirm with your bricklayer what their mortar colouring offering is before making your final decision.

Laneway

Inspired by the character and rustic charm of Melbourne’s famous back streets and laneways. With their inner city character and sometimes bold colour variations, this double sided brick can show manufacturing marks and kiln burns that reflect the age-old authenticity of the materials. Made using traditional presses, each brick has an authentic look and a genuine presence to give an age-old grounding to even the most contemporary of applications.

Laneway Blends

Laneway Bricks are ideally suited for blending on site for a custom “remastered” look. Designers can choose from two or more of the base brick colours, adding blacks and whites as desired for the individual blend they prefer. Packs of individual products will be delivered and bricklayers can blend from the packs for the desired effect. The bricks are double sided, usually with heavier markings and character on the back. Fronts and backs can be blended as desired for the right effect for each project.

We recommend a small dry stack wall of 1 – 2m² be laid out as a reference panel for each blend.

Custom Blends

Blend 1
(Typical red based blend)

Blend 2
(Strong character, higher contrast of blend)

Blend Percentages

Blends	Weathered Red	Fitzroy Blend	Brunswick Blue	Weathered Whites	Weathered Blacks	Packs*
						
Blend 1	85%			10%	5%	17:2:1
Blend 2	55%	15%	15%	10%	5%	11:3:3:2:1

Weathered Bricks

These bricks are an accessory product to be blended on site with one of the Laneway bricks. The white and black colour is a fired on clay based colour that varies from full to only partial coverage. The colour is on the face only of a red brick and any excess bricks can be laid back out as one of the red bricks in the blend.

3

Special Shapes

Shaped bricks are used in conjunction with standard bricks to create distinctive architectural features, adding detail and appeal. Unlike polystyrene or fibreglass mouldings that are simply glued into place, shaped bricks are as durable and colourfast as conventional bricks and are available in a variety of colours.

Nubrik 290

Range	Product	Durability Class	Solar Rating	Colour Group	Size (mm)
-	Available in all Nubrik Australis, Artisan and Traditional colours	EXP	-	-	290L x 110W x 50H

EXP = Exposure grade

Suitable for use in external walls exposed to aggressive environments, such as; areas subjected to salts in the soil, adjacent material or ground water, in coastal areas exposed to attack from windborne salt spray, or retaining walls subjected to fertilisers and ground salts.

GP = General purpose

Suitable for internal and external walls only when above a sheet or membrane damp-proof course and protected by an adequate coping, eaves, roof or similar top covering. These units should not be directly exposed to saline environments.

Solar absorptance rating

In the design of energy efficient buildings, architects and consulting engineers need to be able to calculate the heat loss or gain of materials used to construct these buildings.

For this reason, our product range has been categorised into the below three colour groups:

Light (L) < 0.475
Medium (M) 0.475 - 0.70
Dark (D) > 0.70

Laneway
