URBANSTONE

different in every way

The beauty of UrbanStone lies in its creative design and engineering excellence.

By combining natural stone with a high-strength, cement concrete matrix, UrbanStone provides you with paving that is not only extremely durable but also features the natural beauty of real stone.

UrbanStone paving and landscaping products form a complete and integrated landscaping system. The resulting combination is aesthetically stunning and vastly superior in quality. So whether it's paving, bullnoses, wall cladding or other hand crafted accessories, it all comes together to provide you with a brilliant look and feel that can transform your home into something out of the ordinary.

FINE QUALITIES

THE URBANSTONE STORY

At UrbanStone, we create paving that really is very distinctive; in quality and style. We put all our experience to work, and with the use of state of the art technology, we create inspired solutions that fit perfectly into architectural designs.

The UrbanStone story began in 1993, when in conjunction with the Engineering Department of the City of Perth, we developed an exposed aggregate

concrete paving module to resist the highly abrasive pedestrian traffic experienced in Perth's Central Business District.

Our commercial paving quickly expanded into the residential marketplace with the addition of new product categories and further extensions to our range.

THE URBANSTONE DIFFERENCE

Strong and beautiful

By combining natural stone with a high-strength, cement concrete matrix, we create products that are not only extremely durable but feature a natural beauty.

Industry leading manufacturing

Our wet cast manufacturing process is fully automated and computer controlled throughout the entire production process.

Quality controlled

Controlled curing, combined with our specialized palletized storage system, enhances the quality of all of our paving products.

Extensive expertise

At UrbanStone, we have one of the most experienced teams in the business, to advise and help you choose the right paving for your home or building project.

Above: Shifting Sands Spinafex

MAJOR BENEFITS

When you choose UrbanStone for your home, you'll be happy to know that all our pavers come with major benefits that make a huge difference.

Colours and finishes

The UrbanStone range provides you with a superb range of colours and finish combinations, designed to suit every home.

Weather resistant

UrbanStone pavers will hold up to heavy storms, U.V. degradation, blistering heat, and sub-zero temperatures.

Impact resistance

Our pavers are made from stone and concrete which means they can endure significant impact from external forces.

Low maintenance

When you build with UrbanStone, maintenance and upkeep is minimal.

Termite resistant

Because there's no wood for termites to eat, our pavers won't degrade.

Fire resistant

Our range of UrbanStone pavers are made from non combustible materials, making them fire resistant.

Low environmental impact

The production of our range has minimal impact on the environment because they do not deplete precious natural and limited resources.

FINISHES

to create a certain look

Standard

Our UrbanStone collection, is available in a range of superb finishes that will add that special something to your home.

Quarry

If you're after a finish that's smooth and refined, then Quarry is the perfect choice.

Reef

Subtle indentations in this paver's surface add texture and make the finish truly unique.

Sawcut

Created using our wet cast moulding process, the Sawcut finish features a subtle texture and a finish reminiscent of cut stone.

Premium

Looking for a premium paver with that edge of refinement? Then look no further than our Premium range that comes in a brilliant range of finishes.

Tanyella

The Tanyella finish is created using a polyester honing process which subtly reveals aggregate in the pavers face.

Exfoliated

The Exfoliated finish is created by using abracing process to the pavers face to create a subtle textured finish.

Bush Hammered

We use a shot blasting process which reveals aggregate within the pavers face that adds subtle texture.

Machined

The honing process grinds 2-3mm from the pavers surface producing a matte exposed aggregate finish.

Dimension Cut

The milling process results in a subtle honed texture which just removes the top layer of concrete.

Ultra Premium

For unmatched quality and that look of distinction, the Ultra Premium range has it all.

Shifting Sands Weathered

Our unique weathering process removes the top layer of concrete to reveal a natural aggregate beneath.

Shifting Sands Glazed

Initially shot blasted and then finely polished to remove 2-3mm, the glazed finish is all style.

Available in:

Shifting Sands Weathered

WE ARE

Brickworks

Brickworks Building Products is one of Australia's largest and most diverse building material manufacturers. Under the Brickworks Building Products umbrella are some of Australia's best known building materials brands. Our products include bricks, pavers, masonry blocks, retaining wall systems, precast concrete panels, concrete and terracotta roof tiles, timber products, terracotta façades and specialised building systems.

With a broad product portfolio and manufacturing and sales facilities across Australia, Brickworks Building Products is uniquely placed to service the demands of the building industry.

With over 1,200 staff across Australia and New Zealand, we pride ourselves on our commitment to product, service excellence and our leadership position.
