

Industrial Urban

Style: Industrial Urban

While its origins can be traced back to the factory floor, the residential form of this look is about imperfections and raw, textural finishes. Brickwork provides a coarse, textural feature while balancing smooth and intricate detailing with softer finishes provides the play on materiality central to an industrial aesthetic.

“Our Raven palette is so much more than just shades of grey. Curated with a perfect mix of texture, tone and warming pops of colour, its industrial base is accented by soft statements like Venetian Glass and Circular Breeze Blocks that create substance above starkness.”

Palette: Raven
